DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-4, 6-7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2, as stated, is deemed to be vague and indefinite because it is unclear as to how is the back surface of the front panel is secured to an individual's clothing ? The independent claim 1 is directed to a front panel that is secured to a rear panel to from the envelope and the rear panel is adhered to the clothing.

Claim 3, as recited, is found to be confusing because it is not clear as to how is the supplemental sheet located adjacent to the information sheet, specially when the latter is adhered to the back face of the rear panel and the former is adhered to the front panel ?

Claim 4, the phrase "said supplemental sheet" is found to be indefinite for lack of antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Rouse (3372724).

Rouse relates to an assembly comprising an envelope (figure-1) including a front panel (20) and a rear panel (8) attached together to define the envelope interior, and an envelope opening communicating with said interior. As shown in figure-4, the back of the rear panel has adhesive (40) thereon and covered by a releasable covering (42). The front panel is opaque. It is well known and conventional in the art to provide textual information or other form of decoration on the outside of the envelope for imparting information or aesthetic appeal.

Further, the intended use phrases such as "for providing information", "for providing textual information", "being manually removable ... and insertable", "upon removal", etc. have not been given any patentable weight because said phrases are not found to be of positive limitations to the assembly.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rouse in view of Bockairo (5127676).

Rouse, as discussed above, fails to teach the presence of textual information on the front panel. Bockairo disclose an envelope (100 having a front panel (140 with textual information printed thereon to provide information to an observer. Therefor, it would have been obvious to one having ordinary skill in the art to utilize Bockairo's teaching of using textual information on the front panel of an envelope in the invention of Rouse with the motivation to provide for displaying information for an observer.

Allowable Subject Matter

7. Claims 2-4, 6-7 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Further, the prior art uncovered so far fails to teach the particulate front panel with adhesive on its back surface to adhere thereto a removable, double-side information sheet and that the adhesive secures the panel to individual's clothing.
